10	10	20	30	40	50	60	70	80	90	100	110	120
11	11	22	33	44	55	66	77	88	99	110	121	132
12	12	24	36	48	60	72	84	96	108	120	132	144

Quick tips for memorizing

- **×2** = double it. **×4** = double, then double again.
- **×5** ends in 0 or 5 and is half of ×10.
- **×9 trick:** the two digits of the answer always add up to 9 (9×7=63, and 6+3=9).
- **×10** = just add a zero. **×11** (1–9) = repeat the digit (11×4=44).
- Anything ×0 = 0, and anything ×1 = itself.

Practice idea

Cover one column and say the answers out loud, top to bottom. Time yourself and try to beat your record!
